

# GreenSurv

## Your Future Ready Surveillance Solution

### Real-time storage and replication

Collect real-time streams from your Cameras, and store them locally and/or remotely. You have a choice of planning the recording and replication plans.

### Hosted Solution

Store your media over a secure cloud or on premise. We offer a complete end-to-end solution where the recorded media will be stored which can be accessed securely over SSL by authorized people only based on the roles and privileges assigned. Keep your data safe from tempering and vandalism.

### Centralized Configuration

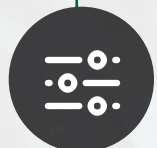

The systems allows you to centrally configure and manage the entire organization from a web portal. You can define outlets/branches and also group them within regions to have better control and visibility. All alerts and information systems will be based on your business policies.

### Security while in the air or at rest

All information stored in the database is encrypted for the purpose of security, also all the information is SSL encrypted while travelling.

### Internet of Things

A combination of surveillance without intelligence is incomplete. Know what is happening in your office and build a healthy and safe environment. It will also help you get better visibility and reduce operational costs

Monitor your branch office in real-time

Service is subscription base and offers most affordable and value driven rates in Pakistan

Maximize the usage of available bandwidth during off-hours for video replication

Select the best suitable plan for data retention as per your requirement.
